 Redis

 Filament

 FastAPI

 Next.js

EXPERIENCE

Fullstack Developer · NauczMnie Sp. z .o.o. May 2024 – present

- A comprehensive SaaS educational platform designed to automate teaching processes, content distribution, and student progress tracking. It provides tutors, schools, and organizations with built-in tools like competency matrices, test creators, and automated material sharing to significantly streamline daily administration.nauczmnie.pl
- A location-based platform and application tailored for discovering real-time local deals, events, and business announcements. It connects users with nearby services by providing instant, radius-based search and live notifications about active promotions in categories like food, shopping, and entertainment.flika.pl

PROJECTS

Streakly Jul 2026 – present

streakly.tech

- Streakly is a web and mobile exam-prep app for IT certifications (AWS, CompTIA, CEH), combining quizzes, timed exam simulations, and spaced-repetition flashcards in one place. Built with Laravel/React (web) , featuring a Free/Premium (stripe) model and support for 9 languages.

Technologies:  PHP  React  TypeScript  Laravel  PostgreSQL  Docker

React Image Spots Apr 2026 – present

maszjan.github.io/react-image-spots

- A plug-and-play React library designed for effortlessly adding interactive hotspots onto images and creating multi-layer visual composites. It features a built-in visual edit mode, providing a complete, drop-in solution to easily place and manage interactive elements without complex configuration.

Technologies:  React  TypeScript

EDUCATION
